**NOTICE of ALLOWANCE**

***Status of the Claims***

This action is in response to papers filed 21 February 2008 in which the previous rejections were traversed. Applicant's arguments have been thoroughly reviewed and are found convincing. The previous rejections are withdrawn.

Claims 14 and 16 are in condition for allowance.

**REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

The claims are drawn to a method of evaluating the amount of target, the method steps include making a probe array via sequential synthesis during which each probe is labeled at the terminus and non-probe matrix positions are labeled during a first synthesis step. Hence, the array comprises matrix positions with and without probes, but all the matrix positions have the same labeling compound. The amount of target is then evaluated based on a comparison between matrix positions having different label combinations i.e. 1) probe-labeled positions, 2) target-labeled + probe-labeled positions and 3) labeled matrix positions without probe or target. The closest prior art (Wolber) as cited in the Final Office Action teaches detection a contrast between probe-bound areas and the surrounding (unlabeled) regions. No prior art was found teaching or obviating the matrix, probe and target labeling combination as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
